

Description: Built an AI-powered assistant that retrieves information from company documents and automatically drafts/sends contextual email responses.

[illegible]

The screenshot displays the AI Agent interface. At the top, there's a navigation bar with 'Personal', 'AI Agent -RAG', and '+ Add tag'. Below this, a workflow diagram is visible, showing a sequence of steps: 'When chat message received' (trigger), 'AI Agent' (main processing), 'Working...' (status), 'Stop' (end), 'Google Gemini Chat Model' (input), 'Simple Memory' (input), 'Get a document in Google Docs' (input), and 'Send a message in Gmail' (output). A notification banner at the bottom right states 'Workflow executed successfully'. The main chat window shows a session with 'AI Agent' and a message: 'Our Core Services'. The message content is: '• **Software Development:** Custom web applications, enterprise solutions, SaaS platforms, ERP/CRM systems, and mobile app development. • **IT Consulting:** Strategic technology advisory, digital roadmaps, infrastructure modernization, and cybersecurity consulting. • **Cloud Computing & DevOps:** Migration and management services using platforms like AWS, Microsoft Azure, and Google Cloud (GCP).'

Another query raised by the user:

The screenshot shows the AI Agent interface with a workflow diagram at the top. The workflow starts with a trigger 'When chat message received', followed by an 'AI Agent' node. Below the AI Agent, there are four nodes: 'Model' (Google Gemini), 'Memory' (Chabimble), 'Tool' (Get a document), and 'Send a message in'. The chat window below shows a conversation where the user asks 'can I have the manager mobile number?'. The AI Agent's response is not yet displayed, with a message saying 'Nothing to display yet. Execute the workflow to see execution logs.'

Unanswered however the user contact is collected to send it to the officials:

The screenshot shows the AI Agent interface with a workflow diagram at the top. The workflow starts with a trigger 'When chat message received', followed by an 'AI Agent' node. Below the AI Agent, there are four nodes: 'Model' (Google Gemini), 'Memory' (Chabimble), 'Tool' (Get a document), and 'Send a message in'. The chat window below shows a conversation where the user asks 'can I have the manager mobile number?'. The AI Agent's response is displayed: 'I'm sorry, but I don't have the manager's mobile number in my records. However, I can send an email to the officials at Abi Private Limited to request this information for you. Could you please provide me with your email address? I will mark you in the CC so you can receive the response directly.' The user's email address 'sritha001@gmail' is entered in the input field.

Escalation made to the officials by the AI Assistant:
